## Covid 19 Vaccines

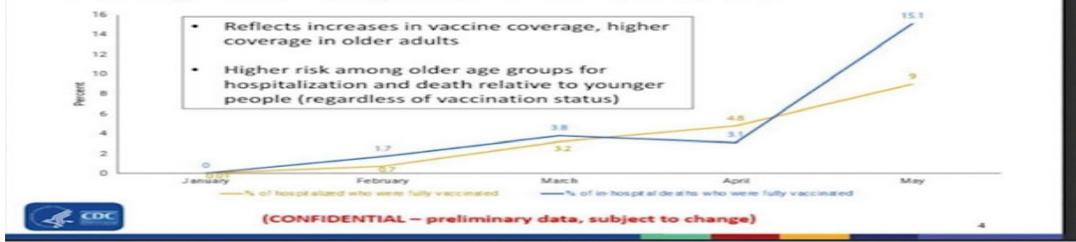

Federal directives have recently pushed for private and public institutions to mandate the vaccination for Covid 19 and expand the program for children. There are several pertinent concerns regarding this liability free experimental medical product.

Mandates have no place in medicine or in a free society. A mandate is in direct conflict with the Patients Bill of Rights. Informed consent is a legally and ethically binding principle which acknowledges the patients inherent right to decline any and all medical product or procedure, and to do so without coercion or force. The Nuremburg Code , a set of research ethics established after WWII in response to human experimentation, explicitly prohibits mandates of experimental products and states; "The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment." With the death and injury toll mounting the products should be immediately recalled.

### Pertinent Considerations;

1. These vaccines are all liability free for the manufacturers.
2. These products contain PEG, a substance that a significant percentage of Americans are allergic to.
3. The vaccinations only claim to reduce symptoms of the virus. Recent CDC data shows that those who have been vaccinated are carrying much higher viral loads and may be more likely to contribute to further spread.
4. Increasing numbers of those who are vaccinated are being hospitalized for Covid. No long-term studies have been done on this vaccine, which is not licensed as a vaccine but as a gene therapy. New data emerging shows high rates of vaccine failure.

### Increasing percentage of vaccinated persons among those hospitalized in COVID-NET

5. Asymptomatic spread is very rare and almost nonexistent.
6. Ingredients have not been fully disclosed and the full inserts are very concerning.
7. VAERS , the only safety monitoring data base for vaccine death and injury, has shown a substantial amount of death and injury from these vaccines.
  - a. 80% of all reports to VAERS are submitted by physicians
  - b. Fraudulent reports to VAERS are a criminal offense
  - c. According to Harvard studies VAERS only captures between 1-10% of all vaccine related death and injury.
8. The vaccines are indiscriminately causing heart problems, neurological problems and death.
  - a. Teens are at higher risks for heart inflammation.
9. The virus itself is very mild if there are not any serious health concerns.
10. Those who have previously developed natural immunity are at a higher risk for adverse reaction to the products.
11. Children often have mild cases and many may already have immunity.
12. Vaccines push pathogens to evolve and could create more/worse variants that become more pathogenic.
13. Several very effective treatments have been made available that reduce symptoms and mortality if given in a timely manner. These treatments do not have the extreme risks and long-term unknown side effects of the vaccine.
14. Previous attempts to create a vaccination for a corona category virus resulted in antibody enhancement/pathogenic priming. The animal test subjects subsequently died and research was discontinued after several children did as well. None of these corona category vaccinations have been evaluated to see if they cause antibody enhancement/pathogenic priming however they all have a

disclaimer that it is a known factor and could happen. It is already occurring in US populations and is expected to be an issue in the Fall.

15. Herd Immunity can only truly be reached via natural infection and natural robust immunity. The vaccines effectiveness to generate long term immunity is questionable, but natural infection results in long term T Cell immunity. Bio individuality dictates that the immune response will differ in every person, thus generating different levels of effectiveness. If prior reporting of case incidence is accurate the United States should already be at natural herd immunity.
16. The long-term effects are completely unknown. Vaccines are not tested and not required to be tested to determine if they cause cancer or affect fertility.
17. mRNA vaccines are licensed and patented as a gene therapy. The natural mRNA tells cells how to function, this injects a synthetic version that (at least temporarily) overwrites that cell "code."
18. The creator of the mRNA technology for vaccinations has become very publicly outspoken that these products are dangerous and should be stopped immediately.

## Search Results

From the 5/21/2021 release of VAERS data:

**Found 262,521 cases where Vaccine is COVID19**

Table

↓	↑ ↓	↑ ↓
Event Outcome	Count	Percent
Death	4,406	1.68%
Permanent Disability	3,299	1.26%
Office Visit	45,004	17.14%
Emergency Room	40	0.02%
Emergency Doctor/Room	34,435	13.12%
Hospitalized	14,949	5.69%
Hospitalized, Prolonged	37	0.01%
Recovered	100,406	38.25%
Birth Defect	142	0.05%
Life Threatening	4,590	1.75%
Not Serious	103,639	39.48%
<b>TOTAL</b>	† 310,947	† 118.45%

† Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 262521 (the number of cases found), and the Total Percentage is greater than 100.
