

The COVID Vaccine

What you should know

The FDA lists death, stroke, pregnancy and birth outcomes, brain swelling, anaphylaxis, autoimmune diseases, and much more as potential adverse outcomes of the vaccine. Any drug with these potential side effects should be never be mandated by a government on its citizens.

Vaccine manufacturers are exempt of liability for any injury or death their products cause.

The ingredients have not and may not be disclosed due to proprietary concerns. How can an individual obtain informed consent for a medical product if they do not know what ingredients were used in manufacturing?

According to the CDC, there are no current plans to provide a Vaccine Information Statement (VIS). A VIS informs recipients of the benefits and risks of a vaccine they are receiving prior to administering the vaccine, as required by the National Vaccine Childhood Injury Act.

Even after taking the vaccine, The CDC doesn't know if it will ever recommend stopping mask usage or staying at least 6' away from others.
